

Benjamin Kellett's visit to our school

Introduction

The aims of this report are to make suggestions for a suitable activity to do with the professional paraglider Benjamin Kellett when he visits our school and to recommend a present to give him. It is based on a survey of 120 students.

Activity with Benjamin Kellett

The majority of people surveyed thought that the best way for our students to have contact with the pilot was to organise a presentation in the school hall. Kellett could be on the stage showing videos of his 200-kilometer flight over the Himalayas, and students could ask him questions about adventure sports.

A suitable present

Most students thought that the school could use the 3D printer to create a topographical map of the European Alps. This custom model would represent the remote mountain areas where he frequently flies and works, serving as a unique item to thank Kellett for his visit.

Recommendations

I would recommend that we organise a presentation with Kellett in the main hall. All students would like to attend and representatives from each class could ask him a question. Perhaps we could also consider presenting him with the 3D-printed map of the Alps as a thank-you present.
